## Description

#### Name

Jia Yi Jian's Recipe Information System

#### Introduction

This recipe information system is designed for university students. For students who don't have a car, it's not easy to get foods from super market anytime. Hence, they decide what to cook based on foods left in their refrigerator. This recipe information system shares recipe list which categorized by the ingredients. In addition to recipe information, I also match beverages to recipes because students like to drink beverages when eating meals.

Intended User Commi	unities	
Regular Users	University Students	
Administrative Users	systemadmin	System Super User
	ri_recipe_developer	Develop more recipes to share on the system
	ri_beverage_developer	Develop more beverages to share on the system
	ri_dessert_developer	Develop more desserts to share on the system

## Authentication and Permission

Description					
Systemadmin	This admin ac	count will assign to m	yself. This account can vie	ew, add, change, and	
	delete any co	ntent in any table.			
ri_recipe_developer	This will assig	n to recipe developm	ent team only. This group	is responsible for	
	adding new re	ecipes in the system, a	and define the recipe type	for those new recipes.	
	So this accour	nt can access any reci	pe related information.		
ri_beverage_developer	This will assign to beverage development team only. This group is responsible for				
	adding new beverages in the system, and define the suitable beverage for existing				
	recipes. This g	group can access any l	beverage related informat	tion.	
ri_dessert_developer	_	•	nent team only. This group	•	
	_	esserts in the system.	This group can access any	y beverage related	
	information.

# • User IDs and Passwords

Description							
Systemadmin	This user is	the own	er of Jia	Yi Jian's Recip	oe Information Sys	stem. This user is t	the only one who
	have fully a	access to	view, ad	ld, change, ar	d delete data in t	he system. Other	users need to ask
	Systemadn	nin to cha	inge or o	delete data in	the system.		
Recipe_Developer	This user b	elongs to	group "	ri_recipe_dev	eloper" which ha	ve fully access to	"recipe" and
	"recipe_ing	gredient"	. This us	er can only vi	ew or add other t	ables.	
Beverage_Developer	This user b	elongs to	group "	ri_beverage_	developer" which	have fully access	to "beverage"
	and "bever	age_ingr	edient".	This user can	only view or add	other tables.	
Dessert_Developer	This user belongs to group "ri_dessert_developer" which have fully access to "dessert" and						
	"dessert_ir	'dessert_ingredient". This user can only view or add other tables.					
Website_User	This user c	an only vi	ew data	in the systen	n. This user canno	t add, change, or	delete any data.

## • Test Instructions

Content/User ID	Recipe_Developer
CATEGORIES	⇒ Click on category list to view category detail. You can see ingredients under this category. Then you might want to click on each ingredient to access further
	information.
	⇒ Create new category for ingredient.
INGREDIENTS	⇒ Click on ingredient list to view ingredient detail. You can see further information about the ingredient.
	⇒ Create new ingredient.
RECIPE TYPES	$\Rightarrow$ Click on recipe type list to view recipe type detail.
	⇒ Create new recipe type.
DESSERTS	⇒ Click on dessert list to view dessert detail.
BEVERAGES	⇒ Click on beverage list to view beverage detail.
RECIPES	$\Rightarrow$ Click on recipe list to view recipe detail. Then you can Delete or edit recipe detail.
	⇒ Back to previous page and create new recipe by clicking "CREATE NEW RECIPE"
	Beverage_Developer
CATEGORIES	⇒ Click on category list to view category detail. You can see ingredients under this category. Then you might want to click on each ingredient to access further information.
INGREDIENTS	⇒ Click on ingredient list to view ingredient detail. You can see further information about the ingredient.
	⇒ Create new ingredient.

RECIPE TYPES	⇒ Click on recipe type list to view recipe type detail
DESSERTS	⇒ Click on dessert list to view dessert detail.
BEVERAGES	⇒ Click on beverage list to view beverage detail.
	$\Rightarrow$ Create new beverage. Then you might want to edit or delete that beverage.
RECIPES	⇒ Click on recipe list to view recipe detail.
	Dessert_Developer
CATEGORIES	$\Rightarrow$ Click on category list to view category detail. Then you might want to click on each
	ingredient to access further information.
INGREDIENTS	$\Rightarrow$ Click on ingredient list to view ingredient detail. You can see further information
	about the ingredient.
	⇒ Create new ingredient.
RECIPE TYPES	⇒ Click on recipe type list to view recipe type detail
DESSERTS	⇒ Click on dessert list to view dessert detail. You can see further information about
	the dessert.
	$\Rightarrow$ Try edit or delete the dessert.
	⇒ Back to precious page and create new dessert.
BEVERAGES	⇒ Click on beverage list to view beverage detail.
RECIPES	⇒ Click on recipe list to view recipe detail.
	Website_User
CATEGORIES	⇒ Click on category list to view category detail. Then you might want to click on each

#### Other Information:

A. If you access recipe detail you will see "Vegetarian? True/False". I use the following code to identify if the recipe is vegetarian or not. If all ingredients included in that recipe are vegetarian, then it's true. Otherwise, it's False.

```
def get(self, request, pk):
    recipe = get_object_or_404(Recipe, pk=pk)
    # recipe_ingredients is a related name of Recipe_Ingredients
```

- B. In order to provide sufficient data in database, some data are randomly generated.
- C. I am interested in cooking so I will keep working on this "Jia Yi Jian's Recipe Information System" in the future. I plan to add the steps of cooking the recipe and also put some images inside to make it more useful.
- D. I commit all my works on Github. Please refer to the URL: <a href="https://github.com/jyjian2/clog">https://github.com/jyjian2/clog</a>
